

## Complete Summary

---

### TITLE

Routine prenatal care: percentage of pregnant women who received counseling and education by the 28th week visit.

### SOURCE(S)

Institute for Clinical Systems Improvement (ICSI). Routine prenatal care. Bloomington (MN): Institute for Clinical Systems Improvement (ICSI); 2003 Jul. 56 p. [94 references]

## Brief Abstract

### DESCRIPTION

This measure assesses the percentage of pregnant women who received counseling and education by the 28th week visit.

### RATIONALE

The priority aim addressed by this measure is to increase the percentage of pregnant women who receive timely prenatal counseling and education as outlined in the Institute for Clinical Systems Improvement "Routine Prenatal Care."

### PRIMARY CLINICAL COMPONENT

Prenatal care; counseling and education; breast feeding; vaginal bleeding during pregnancy; childbirth classes

### DENOMINATOR DESCRIPTION

Total number of questions having either a "yes" or a "no" answer indicated on returned surveys

### NUMERATOR DESCRIPTION

Number of "yes" answers on the survey

The survey questions are:

1. Has your provider or someone from the clinic, community health program, or worksite explained the benefits of breastfeeding?

2. Has your provider or someone from the clinic, community health program, or worksite told you to report vaginal bleeding during your pregnancy?
3. Has your provider or someone from the clinic, community health program, or worksite discussed attending or availability of childbirth classes with you?

### Evidence Supporting the Measure

#### PRIMARY MEASURE DOMAIN

Process

#### SECONDARY MEASURE DOMAIN

Not applicable

#### EVIDENCE SUPPORTING THE MEASURE

A clinical practice guideline or other peer-reviewed synthesis of the clinical evidence

#### NATIONAL GUIDELINE CLEARINGHOUSE LINK

## Data Collection for the Measure

### CASE FINDING

Users of care only

### DESCRIPTION OF CASE FINDING

All women who are in the course of prenatal care and who are present for the 28th week visit.

These data can be collected by a patient survey at the 28th week visit. Since that visit uses a glucose tolerance test and there is a waiting time for completion of the test, this survey can be completed during that waiting time. The patient completes the survey by herself.

This may be collected on everybody, or a sample. If a sample is done, it is suggested that the data be collected on specific days (or times) to create a regular pattern for data collection. This pattern will allow for more consistent and regular data collection. The minimum sample size is 15 per month or 40 per quarter.

These data can be collected monthly.

### DENOMINATOR SAMPLING FRAME

Patients associated with provider

### DENOMINATOR (INDEX) EVENT

Encounter

### DENOMINATOR INCLUSIONS/EXCLUSIONS

#### Inclusions

Total number of questions having either a "yes" or a "no" answer indicated on returned surveys

#### Exclusions

Unspecified

### NUMERATOR INCLUSIONS/EXCLUSIONS

#### Inclusions

Number of "yes" answers on the survey

The survey questions are:

1. Has your provider or someone from the clinic, community health program, or worksite explained the benefits of breastfeeding?
2. Has your provider or someone from the clinic, community health program, or worksite told you to report vaginal bleeding during your pregnancy?
3. Has your provider or someone from the clinic, community health program, or worksite discussed attending or availability of childbirth classes with you?

Exclusions  
Unspecified

#### DENOMINATOR TIME WINDOW

Time window is a single point in time

#### NUMERATOR TIME WINDOW

Episode of care

#### DATA SOURCE

Patient survey

#### LEVEL OF DETERMINATION OF QUALITY

Individual Case

#### PRE-EXISTING INSTRUMENT USED

Unspecified

### Computation of the Measure

#### SCORING

Rate

#### INTERPRETATION OF SCORE

Better quality is associated with a higher score

#### ALLOWANCE FOR PATIENT FACTORS

Unspecified

#### STANDARD OF COMPARISON

Internal time comparison
