

Complete Summary

TITLE

Chronic obstructive pulmonary disease (COPD): percentage of patients with COPD whose physician inquired about smoking cessation (if patient a smoker) at every visit.

SOURCE(S)

Institute for Clinical Systems Improvement (ICSI). Chronic obstructive pulmonary disease. Bloomington (MN): Institute for Clinical Systems Improvement (ICSI); 2003 Dec. 67 p. [113 references]

Brief Abstract

DESCRIPTION

This measure assesses the percentage of patients with chronic obstructive pulmonary disease (COPD) whose physician inquired about smoking cessation (if patient a smoker) at every visit.

RATIONALE

The priority aim addressed by this measure is to increase to 100% the number of patients with chronic obstructive pulmonary disease (COPD) who receive information on the options for tobacco cessation and information on the risks of continued smoking.

PRIMARY CLINICAL COMPONENT

Chronic obstructive pulmonary disease; smoking cessation

DENOMINATOR DESCRIPTION

Patients with a diagnosis of chronic bronchitis: (491.8, 491.20, or 491.21) or asthma with chronic obstructive pulmonary disease (COPD) (493.2) or chronic emphysema (491.20) who have an indication in their charts that they are users of tobacco who present for a clinic visit within the reporting month

NUMERATOR DESCRIPTION

Number of patients from the denominator with any indication in the chart that the physician asked about a change in smoking status and/or readiness to quit

Evidence Supporting the Measure

PRIMARY MEASURE DOMAIN

Process

SECONDARY MEASURE DOMAIN

Not applicable

EVIDENCE SUPPORTING THE MEASURE

A clinical practice guideline or other peer-reviewed synthesis of the clinical evidence

CASE FINDING

Users of care only

DESCRIPTION OF CASE FINDING

Patients with chronic obstructive pulmonary disease (COPD) who have any indication on their charts that they are users of tobacco who presented to the clinic within a designated time period

Identify patients with a clinic visit in the reporting month who meet the inclusion criteria. Data may be collected by medical record review.

Randomly selected cases may be reviewed monthly.
